Part 2(a): In claims 1 and 7, the following limitations are new issues that would require further consideration and/or search: First, first operand and second operand comprising respective first and second propagate, kill, and generate recoded number representations of respective first and second binary operands. Second, a modified carry-save adder configured to receive the third propagate, kill, and generate recoded number representation, add the separate propagate, kill, and generate bits of the third propagate, kill, and generate recoded number representation. Third, mathematically combining the third propagate, kill, and genearte representation and the carry-in value to generate a sum value and a carry value.

Part 5(c): the arguments are not persuasive based on the amended claims filed March 25 2003. The present arguments are based on the recent amended claims filed July 18 2003 which raise some new issues that would require fruther consideration and/or search.
